Does China have a role in Afghanistan's EV market?

As China dominates the EV market, Afghanistan's vast lithium deposits have become a geopolitical focal point. Following the U.S. withdrawal, China has swiftly stepped in, exploring economic advantages amidst Western sanctions on the Taliban-led Afghan government.

Why are electric cars so affordable in China?

Electric car affordability improved in all car segments in China thanks to falling battery pack prices, a high level of supply chain vertical integration and fierce competition within the Chinese EV market.

Which EV model is cheapest in India?

While the cheapest BEV model available (Renault's Kwid E-Tech Electric) was produced in China, it was sold under a European brand. In India, high import duties on EVs and the availability of locally made, affordable electric models meant the share of Chinese imports in the country's EV sales remained below 15% in 2024.

How much does a battery electric car cost in 2024?

In 2024, this price distribution was reflected in sales, with the median price paid for a battery electric car standing at around USD 24 000, about USD 700 less than for an ICE car.
