Amsterdam is transforming a former industrial neighbourhood into a low-carbon, smart Positive Energy District with mixed uses.

Over the past decade, the Amsterdam Area has set the pace for transitioning into a greener, more sustainable future. At the core of this transformation lies smart grid technology, a ...

This will require radical changes to how the country's energy system works, and this report sought to find out what the potential is for Smart Integrated Decentralised Energy (SIDE) systems, a highly ...

In Almere, a fast-growing city just east of Amsterdam, one site faced the same challenge: insufficient access to power. Instead of waiting years for a new grid connection, we worked to find another path ...

A study commissioned by the Dutch Ministry of Economic Affairs and the Netherlands Enterprise Agency is monitoring the performance of three microgrid projects in Amsterdam and one ...

Schneider Electric offers efficient microgrid solutions based on a combination of Edge Control Systems, Connected Products, Applications, Analytics, and Services. Connected Products include ...

It is Prologis' first microgrid in Europe and a scalable blueprint for other constrained sites, with its modular design that can be tailored to local conditions. Similar configurations are in use by ...

From stabilizing microgrids to enabling energy arbitrage, Amsterdam's industrial battery revolution isn't coming--it's already here. The question isn't whether to adopt storage tech, but how quickly you can ...

Features of the integrated use of Bergen Engines, Marelli Motori alternators and Piller IPCS make it ideal for primary power of islanded microgrid industrial applications.

We have been involved from the ground up, starting with a feasibility study and acquiring special regulatory

exemptions to develop a private microgrid.
