-----  
How big is the portable power bank market in 2025?

The portable power bank market, valued at \$3182 million in 2025, is projected to experience steady growth, driven by increasing smartphone usage, the rise of portable electronic devices, and frequent power outages in various regions. The market's compound annual growth rate (CAGR) of 1.2% reflects a consistent demand, though not explosive growth.

What is the global portable power bank market?

The global portable power bank market, estimated at several hundred million units in 2025, exhibits a moderately concentrated landscape. Key players like Anker, Xiaomi (MI), and Romoss hold significant market share, while numerous smaller brands compete for the remaining volume.

What features should you consider when buying a portable power bank?

Pass-through charging is another feature to consider; with it, you can charge your device and a portable power bank simultaneously. That's convenient if both your phone and backup battery are running out of power.

How mobile devices will drive the growth of power bank market?

The increasing availability of mobile devices is expected to drive the growth of the power bank market. The availability of mobile devices and the use of social media make people rely heavily on their devices and require reliable charging options to stay connected.
