A report from Wood Mackenzie identifies five key trends that will define the energy storage industry in 2026, including supply chain restructuring and the rise of non-lithium batteries.

Get the latest updates on battery tech, grid-scale storage & green energy - with trusted news, trends & expert commentary

"Despite regulatory uncertainty, the drivers for energy storage are strong and the industry is on track to produce enough grid batteries in American factories to supply 100% of domestic ...

Enea surges with 400 MW of solar and wind, widening daytime power, firming evenings as storage matures--cutting costs, boosting reliability, PPA-backed growth, battery-ready grids and ...

Real cases show iHEMS-equipped PV+storage cuts energy costs by 14-18% and shortens investment payback periods to 4-6 years. Supported by federal/state incentives and grants ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

Chinese battery manufacturer EVE Energy has secured a contract with the Malaysian government to deploy an AC/DC integrated 36MWh solar-plus-storage system at Kuala Lumpur International Airport ...

Are there any latest news on photovoltaic energy storage

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...
