-----

Get the best lithium ion battery in Iran at reliable prices. Long-lasting performance, fast charging, and ideal for solar systems, homes, and industrial backup applications.

TEHRAN (ANA)- Iranian researchers at the University of Tehran presented a new method for improving the performance of structural lithium-ion batteries.

As battery technology advances, it won't be long before fleets of fossil fuel-free rigs travel long distances on the road network. While the battery industry has made great strides in delivering ...

Moreover, in order to facilitate the progress of lithium ion battery research in the country, the Energy storage laboratory gives the required service for assembling and testing of lithium ion ...

Natural Battery Technologies design, manufacture, supply and support lithium-ion battery packs for Electric Vehicles, Energy Storage Systems and Biomedical Devices.

TEHRAN (Tasnim) - In a bid to help the country achieve self-sufficiency in the field of lithium-ion battery cells used in electric vehicles, the Iran Space Research Center succeeded in...

TEHRAN - The Iranian Ministry of Defense inaugurated its cutting-edge lithium battery pack production line on Monday. The project, considered a ...

? Facile synthesis and simulation of MnO<sub>2</sub> nanoflakes on vertically aligned carbon nanotubes, as a high-performance electrode for Li-ion battery and supercapacitor

My research interests center around the development and application of numerical and experimental methods to improve the performance of energy systems.
