PAC SolarAire is a modular air conditioner run by solar energy. The total direct current (All DC) power from the solar cells can be directly connected to the machine, without conversion to alternating ...

The solution? Solar-powered air conditioners. These innovative units are a game-changer for Bangkok residents. They combine the comfort of traditional air ...

With decisive leadership, strong governance, and community engagement, Bangkok can become a global model for heat-resilient, sustainable, and livable cities, proving that even in the face of climate ...

Sabuy Square is a joint project launched by Seacon Square, Cool Cool Ltd and Bangkok Metropolitan Administration to serve as a model of energy conservation while protecting public ...

Urban Heat Islands (UHIs) are expanding in anthropized areas, causing serious climatic consequences such as rising temperatures and citizens' discomfort. Several studies have identified and confirmed ...

Road renewable energy system has raised much attention from both industrial and academic research on how abundant solar radiation absorbed by road surfaces can be collected ...

While the application of thermoelectric technology to cool the outdoor environment is rare, a novel solar-driven pavement thermoelectric system ...

Vehicle emissions and heat released from air conditioning create an endless heat cycle, making cities increasingly hot and affecting people's long ...

Dark asphalt surfaces, absorbing about 95% of solar radiation and warming to 60-70 °C during summer, intensify urban heat while providing substantial prospects for energy extraction.

Can Bangkok s mobile pavement be equipped with solar air conditioning

The system is an environmentally friendly outdoor air conditioning system that relies on the use of solar cells to produce the energy the system needs. Nevertheless, other forms of renewable ...
