What's sad about the handling of this news is that it's still good news for clean technology and the environment. The two largest prisons will have photovoltaic energy systems that will...

Six correctional facilities in Connecticut will now operate solely using solar energy, according to Gov. Ned Lamont's office. The governor made the announcement Thursday, saying ...

Seven solar systems have been completed and are operating at six state correctional facilities, generating an estimated \$11 million in energy savings and reducing carbon emissions by ...

The new energy efficient lighting follows the announcement that 16,000 solar panels will be installed at 19 prisons across England in the coming months, cutting more than 1,300 tonnes of carbon and ...

Connecticut is making significant strides in renewable energy by installing solar panels at several state prisons, a move projected to save the state an impressive \$11 million in electricity costs ...

Explore how solar energy cuts prison costs and trains inmates for green jobs, transforming correctional facilities into sustainable systems.

(HARTFORD, CT) - Governor Ned Lamont today announced that seven solar energy systems have been installed and are now operating at six of Connecticut's correctional facilities in a ...

Correctional facilities can integrate renewable energy sources such as solar panels to power communal areas and outdoor lighting.

The state says that the seven energy systems will collectively deliver more than eight megawatts of renewable energy to the correctional facilities, saving the state more than \$11 million in...

Can prisons install photovoltaic panels and lighting lines

Standing in front of an array of 4,500 Canadian solar panels and across from a wall topped with barbed wire, Gov. Ned Lamont today announced the completion of seven solar projects at prisons...
