The VAC Solar containerised solutions include the required high voltage inverters, LiFePO4 batteries and MCCs (Motor Control Centres) complete with the AC and ...

Established in 1973, Universal Lightning Protection & Earthing Services T/A Lightning Protection Services specialises in all aspects of earthing and lightning ...

SME is an SABS ISO 9001:2015 certified specialist company with 40 years+ experience in the field of lightning protection, earthing and surge protection solutions.

For standard PV power stations, grounding resistance should be below 4 ohms; for large-scale PV power stations or areas with frequent lightning, it should be below 1 ohm. In high-resistivity soil, ...

We pride ourselves to be one of 100% black owned companies in their field of earthing & lightning protection. With the experience we have of the market we are able to comply to the relevant ...

Our expertise lies in providing external structural lightning protection, lightning surge protection - power radio, instrumentation and data systems, supply and installation of LV and HV (transformer) earthing ...

Our advanced lightning protection solutions are specifically designed to withstand the rigors of mining activities, ensuring that your valuable machinery, control systems, and data remain safe from ...

We inspect, test, and certify existing earthing and lightning protection systems, ensuring full compliance with South African standards (SANS & IEC). Peace of ...

Our certified engineering team provides comprehensive technical support for all installed photovoltaic storage
