Chery, a large Chinese automaker, now claims to have a GWh-level all-solid-state battery production line under development in Wuhu, Anhui Province. This is being developed jointly ...

The plant is expected to start operation in the coming months, to churn out the first-generation batteries with a record energy density of 280 Wh/kg.

SMART Smart electric drive Smart platform-based and integrated pure electric drive. Multi-power drive system, multi-drive combination mode. Motor efficiency up to 97%. Energy recovery rate up to 100%.

According to Chinese media reports, Chery unveiled its first self-developed solid-state battery module at a conference. The new battery prototype achieves a cell energy density of 600 Wh/kg.

At the 2025 Chery Global Innovation Conference held on October 18 in Wuhu, Chery Automobile unveiled its first self-developed all- solid-state battery module, a prototype achieving a ...

On Monday, LG Energy Solution announced that it has signed a six-year contract to supply large-format 46-series cylindrical batteries to Chery Automobile, China's fourth-largest ...

LG Energy Solution will supply Chery with a total of 8 GWh of next-generation 46-series cylindrical batteries over the next six years, enough to power about 120,000 EVs. The battery supply ...

Chinese automaker Chery has revealed a breakthrough solid-state battery module boasting 600 Wh/kg of energy density, nearly double that of today's best lithium-ion EV packs.

Chery said its "Kunpeng" EV battery brand would encompass square-shaped lithium iron phosphate, ternary and large cylindrical ternary batteries -- all of which it claimed would be fast ...

Chinese automaker Chery has taken another step toward putting solid-state batteries on the road. Just months

Chery New Energy Storage

after unveiling a prototype, the company confirmed that it plans to deploy the...
