-----

Armenia's solar sector saw record growth in 2025, adding 615 MW to reach 1.1 GW total and meet a key 2030 national energy target five years ahead of schedule.

The Masrik solar project in Armenia reaches key milestone with main transformer installation. [Photo/CMEC] Undertaken by China Machinery Engineering Corporation (CMEC), a subsidiary of Sinomach, ...

FRV, a renewables developer based in Madrid and part of Saudi Arabia's Jameel Energy, has completed a 62 MW solar plant in Masrik, Gegharkunik province, Armenia. The project was constructed in ...

One of China's leading clean energy companies, SANY Group, is exploring investment opportunities in Armenia in the field of solar energy and energy storage systems. The company is ...

Image: Yuri Krupenin/UnsplashArmenia's cumulative solar capacity has reached 1.1 GW, the country's Minister for Territorial Administration and Infrastructure, Davit Khudatyan, has said. The total ...

Harutyunyan added that the capacity of solar and wind power plants in Armenia is planned to increase to 2 GW by 2040 to align with the country's long-term energy strategy.

Spain-based renewables developer Fotowatio Renewable Ventures (FRV) said on Tuesday it has commissioned the Masrik-1 solar farm in Armenia, the country's largest photovoltaic facility to date, with an ...

Energy specialist Vahe Davtyan argues that Armenia's rapid expansion of solar power is creating energy system risks due to lack of proper integration, storage strategy, and coordination with existing ...

The rationale is straightforward: the existence of 1,000 MW solar power plants presents certain challenges for Armenia's energy system." The 1 GW threshold suggests strong solar deployment in 2025.
