UAE-based Global South Utilities, an energy and water infrastructure company, is boosting its solar power generation capacity in Yemen to provide electricity to thousands of homes amid growing ...

Since 2015, following the intensification of the armed conflict and the collapse of the government electricity grid, cities and villages in Yemen have suffered from frequent power outages, sometimes ...

The project seeks to improve access to electricity in rural and peri-urban areas across the country. Prioritizing resilience and sustainability, UNOPS installed high quality and robust solar systems built ...

UNDP has established a hybrid mini-grid plant project in Ash Shamayatain, Taiz Governorate, combining solar and wind power to provide reliable and clean energy to remote and off ...

This initiative has implemented decentralized off-grid solar solutions across Yemen, reaching over 152 public service facilities, including schools, healthcare centers, and local ...

This project focuses on an off-grid hotel application in Yemen, where no stable utility grid is available. To address these challenges, the UE engineering team designed a 250kW hybrid PV ...

A large energy storage cabinet isn't just a backup plan; it's becoming the backbone of industries, hospitals, and telecom networks. Let's unpack how these systems work and where they shine.

In order to reduce their carbon footprint and have more silent hours, a pre-assembled containerized solar system with lithium battery storage was installed by GSOL and our local partner.

Collectively, the two projects will deliver renewable energy to more than one million homes, making this the largest initiative of its kind in Yemen's clean energy sector.
