Unlike traditional approaches that rely on onshore power grids or single-source renewable systems, the OMPP combines offshore wind and solar power with hybrid energy storage, ensuring a reliable ...

Our compact, powerful and reliable offshore power generator sets are designed to meet the demanding requirements of the offshore platform power supply where ...

At the beginning of the Tier 4 transition, our engineering team had the opportunity to work with different customers in different markets to design and develop a line of ...

This study presents a novel Offshore Mooring and Power Platform (OMPP) that integrates Platform-to-Ship systems to electrify anchored and bunkering ships, significantly reducing ...

Our containerised solutions are designed to provide optimal performance across various site conditions, ensuring excellent reliability for all your power generation ...

Containerised Power Station Concepts Power Generation Research and Experience Broad Hazardous and Non-Hazardous Offshore Locations Worldwide Service and Support In partnership with our customers we develop the right, most applicable and best power station concepts for their needs. With GenSys container power generating solutions it is possible to deliver energy to nearly any place where it is needed, even on islands and areas where other forms of power generation are not available.
