What are solar PV end-of-life waste management and recycling regulations?

Table 2. Solar PV end-of-life waste management and recycling regulations in China and the USA. The GB/T 38,785-2020 standard provides technical requirements for recycling thin-film photovoltaic modules and reusing them for building use. Furthermore, China has also established other standards and guidelines for the management of EOL PV waste.

Are PV panels a general or industrial waste?

In most countries, PV panels are classified as general or industrial waste and managed in accordance with general waste treatment and disposal requirements. Beyond general waste regulation, voluntary and regulatory approaches have been specifically developed for managing end-of-life PV waste.

Are solar PV panels regulated by e-waste regulations?

Even though solar PV panels significantly differ from typical consumer electronic products, global regulators view PV panels increasingly in the context of e-waste regulations. Solar PV currently accounts for less than 1% of total annual e-waste volumes.

Are there regulations & guidelines for managing solar PV EOL waste?

As of March 2023, various states in the United States have promulgated regulations and guidelines for managing EOL waste from solar photovoltaic (PV) systems. The regulations and guidelines for managing solar PV EOL waste in particular states follow.

A review by the International Renewable Energy Agency of regulations and guidelines for recycling solar panels shows that the majority of countries do not have specific regulations for end-of ...

Abstract As solar energy emerges as a pivotal renewable energy source, the environmental challenge of end-of-life photovoltaic (PV) module disposal intensifies. This literature ...

What is IEA PVPS Task 12? Task 12 aims at fostering international collaboration in safety and sustainability that are crucial for assuring that PV grows to levels enabling it to make a major ...

Index Terms-Circular economy, end-of-life PV panels, extended producer responsibility (EPR), photovoltaic

recycling, renewable energy waste management, silicon recovery, sustainable ...

Standard for Photovoltaic Modules and Photovoltaic Inverters and the European Committee for Electro Technical Standardization (CENELEC) EN50625-1-4 (2018) [7] on collection, ...

Voluntary and regulatory approaches to end-of-life management in leading markets In most countries, PV panels are classified as general or industrial waste and managed in accordance ...

The streamlined universal waste regulations are expected to promote the collection and recycling of solar panels and encourage the development of municipal and commercial programs to reduce the ...

On Nov. 28, 2024, China's State Administration for Market Regulations published a recommended national standard that provides general rules for the downcycling of photovoltaic (PV) modules. The ...

The solar photovoltaic (PV) industry has experienced rapid growth in recent years, resulting in a substantial increase in the amount of end-of-life (EOL) waste generated by these ...

It explains when waste ceases to be waste and becomes a secondary raw material (so called "end-of-waste" criteria), and how to distinguish between waste and by-products. As such, it is an essential ...
