-----

The first of four solar power stations commissioned under the Cook Islands Southern Renewable Energy Project will be officially opened on the island of Mitiaro this week, ...

That's the reality for many in the Cook Islands, where imported fossil fuels power 90% of electricity generation. But here's the game-changer: photovoltaic (PV) systems with energy storage can ...

Infratec Chief Executive Greg Visser said the four solar plants were now providing clean, reliable and affordable energy to almost 1500 people - or about 9 percent of the Cook Islands' population.

This year, massive solar farms, offshore wind turbines, and grid-scale energy storage systems will join the power grid. Dozens of large-scale solar, wind, and storage projects will come online ...

The Cook Islands has abundant solar radiation, which makes solar electricity PV an attractive option. On average, about 80 percent of households already use solar water heating, and we ...

Over the last five years the Cook Islands have made huge strides to reach its national electricity target of 50% of islands converted to renewable energy sources by 2015, with the remaining ...

IOTR Energy is a start-up company based in the Cook Islands with a focus on the deployment of Solar Farms, Residential and Commercial Solar ...

The first three islands have small, standardized, centralized solutions (solar PV coupled with battery with existing diesel backup). An order of magnitude larger, Aitutaki will be ...

Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce ...
