What makes a Drivadan greenhouse special?

Drivadan's special construction of steel, aluminum, and glass - including safety glass - provides not only durability but also flexibility. You are not bound by standard sizes; a Drivadan greenhouse can be customized to the exact length, width, and height that fits your garden and your needs.

How does a greenhouse work?

The greenhouse can be equipped with climate control that automatically opens and closes roof windows in the greenhouse controlled by temperature, wind, precipitation, and humidity. This ensures that plant growth receives the best possible conditions.

How can a greenhouse be installed?

It can be installed in both continuous or smaller, interconnected sections, depending on preferences and needs. The greenhouse can be equipped with climate control that automatically opens and closes roof windows in the greenhouse controlled by temperature, wind, precipitation, and humidity.
