Hello, I would like to crossflash the current DVD drive version firmware to a new one. I am not computer literate so that I would appreciate any help from any people who carried out a firmware

Here is the explanation text, but the question is how is it resolved? Windows cannot start this hardware device because its configuration information (in the registry) is incomplete or damaged. ...

cable or slight corrosion on the contacts (usually for a laptop) and other issues. Your CD drive or DVD drive is missing or is not recognized by Windows or other programs

My CD/DVD ROM isn't working and it shows this "Windows cannot start this hardware device because its configuration information (in the registry) is incomplete or damaged. (Code 19)" ...

All my icons have defaulted to "windows media player" no programs work how can I correct this?

In principle Wireless is a substitute to a wire. As long as there is a connection between the Wireless card and the Wireless Router it does not make any difference Network wise.

I'm responsible for maintaining an assortment of Windows 7, 32 and 64 bit machines on a Domain with a Windows 2003 server (non-profit organization and there's no money for a server ...

I have downloaded Windows 10 to my desktop PC (having had no problems with it previously on my laptop - both are DELL) The 10 downloaded etc no problem but now I cannot boot ...
