-----  
Can the EU revive solar PV Manufacturing in Europe?

The EU's opportunities are now aligned with the Clean Industrial Deal proposed by the EU Commission, which should help revitalize the Solar PV manufacturing in Europe, although more support measures will still be needed. Kivanc has been added to this edition of Sinovoltaics' Solar Supply Chain Map.

Will the European solar PV market continue to grow?

The European solar PV market is poised for continued growth, but the explosive expansion driven by the energy crisis is now subsided. In the coming four years, growth is expected to stabilise at a more moderate annual rate of 3% to 7%.

What is the EU export value of solar panels?

By contrast, the EU export value of wind turbines (EUR2.8 billion) was much higher than the corresponding value for imports. The EU import value of solar panels decreased by 43% between 2023 and 2024 (see Figure 2), due to a drop in prices, even though the quantity imported slightly increased by +2%.

Which sector dominated the European solar PV market in 2024?

However, the utility-scale sector dominated in 2024, capturing 42% of the market - an increase from 36% in 2023 and its strongest performance in the past five years. The European solar PV market is poised for continued growth, but the explosive expansion driven by the energy crisis is now subsided.

Although the EU remains a net importer of solar panels, in 2023 it exported EUR900 million worth of solar panels, mainly to Switzerland and the UK, and smaller quantities to countries such as ...

While the European Union's Clean Industrial Deal promises to boost domestic PV production, the region is currently grappling with a wave of bankruptcies and factory closures.

The European solar PV market is poised for continued growth, but the explosive expansion driven by the energy crisis is now subsided. In the coming four years, growth is expected ...

Discover the state of solar panel manufacturing in Europe, the challenges posed by imports, and what EU countries are doing to rebuild local production. Learn how European-made solar can boost ...

# Current status of photovoltaic panel exports to the EU

This article presents an overview of the EU's international trade in three key product groups: wind turbines, solar panels, and liquid biofuels. It compares these categories, traces their ...

In general, the EU market is facing challenges with several bankruptcies. The EU's opportunities are now aligned with the Clean Industrial Deal proposed by the EU Commission, which should help ...

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, ...

During January-October 2024, EU countries imported approximately 83 GW of PV modules from China, with total imports expected to be around 100 GW by the end of the year. These ...

The report provides a detailed year-by-year analysis for 2024 and a forecast extending to 2028, covering market growth scenarios under different policy environments, investment trends, and ...
