Are electric cars a good idea in Denmark/Sweden?

Future political support for electric cars is very uncertain in Denmark/Sweden. The development of public incentives for electric cars is very unpredictable in Denmark/Sweden. My next car will be an electric car. If I had an electric car and a normal car available, I would mainly use the electric car.

Do car users in Denmark and Sweden support BEVs?

While car users in Denmark and Sweden showed similar profiles, one exception was a more negative evaluation of and higher uncertainty about political support for BEVs by Danes. Modelling purchase intention, we found a significant effect of the new fast chargers in Denmark but not in Sweden, while the opposite was the case for information campaigns.

Will Denmark have a 500,000 EVs by 2030?

The 2019-elected government has a goal for Denmark to have 500,000 PEVs (BEVs and plug-in hybrids) and a ban on new gasoline and diesel cars by 2030. The intent is to reach the goal by investing in charging infrastructure and prolonging the agreement on discounted electricity for private customers (Socialdemokratiet, 2019).

How many fast charging stations are needed in Denmark?

For Denmark, it has been estimated that 2000 fast charging stations would be needed to reach the governments' goal of 1 million electric vehicles by 2030 (DTU and DEA, 2019). However, BEV adoption also requires that people are aware of ongoing improvements in charging infrastructure and vehicle technology.

Sales of electric vehicles (EVs) are rising rapidly thanks to an increased interest in minimisation of fossil fuel use by environmentally conscious consumers. In using energy storage systems such as ...
