How much does solar panel installation cost?

Let's look at how much solar panel installation costs. The cost of solar panels varies hugely depending on the type and size of the system you require. A 4kW photovoltaic (PV) system, suitable for a 2-3 bedroom house typically costs around $\$8,000$ (incl. installation). Including an inverter and solar battery takes the average cost to around $\$12,000$

Will adding a solar battery increase my solar panel installation costs?

Adding a solar battery will increase your solar panel installation costs. Generally speaking, it's more cost-effective to install your solar battery system at the same time as your solar panels (rather than adding it later on). Read our solar battery storage system cost guide for more detailed information.

Should you install solar panels yourself?

When you install solar yourself, you don't have to pay labor costs, customer acquisition costs, or installer profit margins. However, installing solar panels is dangerous, and taking the DIY route can void your warranties and even prevent you from connecting to the grid. How much do solar panels cost if I buy used solar panels?

How much do commercial solar panels cost?

Solar panels for businesses. Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.
