1. AGV-based Material Handling - Full-line AGV transportation system - High flexibility and compatibility

Our expertise encompasses the design and delivery of cutting-edge equipment for assembling lithium-ion and sodium-ion batteries, catering to applications ranging from residential and commercial ...

Since 2019, Zonzsin has been continuously providing first-tier customers (Eg. SAIC Group, BYD, Tesla...) with professional customized intelligent production line solutions for battery module PACK. Our ...

This production line is mainly used for 32140/40140 cylinder lithium battery back part application process, for cell sorting, AI intelligent appearance detection, automatic welding, automatic turning, ...

This production line is used for the semi-automatic production of energy storage containers, compatible with the production of main control box (673*711.5*234), electric box (1140*810*243.4) and container ...

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly ...

The company is deeply engaged in the research, development and manufacturing of assembly lines and aging lines in the fields of new energy, medical devices, and commercial displays.

To meet this need, Semco Infratech has developed a fully automated Energy Storage Assembly Line --a streamlined, high-efficiency manufacturing ecosystem that transforms individual lithium-ion cells ...

The BESS (Battery Energy Storage System) container assembly line is an advanced automated production system designed for efficient and precise assembly of large-scale energy storage containers.

Product Strength The production capacity is 10 container cabinets per shift, adopting an automatic clustering

Energy storage container automatic production line manufacturer

solution, which significantly enhances operational safety, reduces labor intensity, and ...
