-----  
How much does a lithium ion battery cost in 2025?

China leads at \$84/kWh with LFP, while stationary storage packs hit benchmark lows of \$50/kWh amid innovation and hedging strategies. Global lithium-ion battery prices continued their downward trajectory in 2025, with average pack costs falling 8% to \$108 per kilowatt-hour, according to BloombergNEF's annual survey.

How much does a lithium-ion battery cost in China?

Recent tenders in China have highlighted the severity of the pricing frenzy, with average lithium-ion battery energy storage system-level bids falling to around \$65/kWh, a figure that has startled Western markets.

Will lithium-ion battery prices continue to decline in 2026?

Global lithium-ion battery prices will continue their decline in 2026, though at a slower pace of 3%, reaching \$105 per kilowatt-hour. According to the latest survey from research firm BloombergNEF (BNEF), this trend extends a price reduction trajectory of over 93% since 2010, although the pace of decline has noticeably decelerated.

Why are low-cost batteries so expensive in China?

China maintained its lead in low-cost batteries, with average prices dropping 13% to \$84/kWh. Factors driving this include reduced input costs, production overcapacity, aggressive price competition and a strong shift toward lithium iron phosphate (LFP) chemistries.

Factory Energy Storage Lithium Battery Price Trend: Key Drivers and Market Outlook Summary: This article explores the factors shaping lithium battery pricing for industrial energy storage systems, ...

The global battery market, particularly for lithium-ion batteries, is experiencing significant growth driven by increasing demand for electric vehicles, renewable energy storage, and high ...

Lithium metal price trend analysis with weekly real time pricing forecasts, outlook, market trends, historical data and spot prices.

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in

# Energy storage lithium battery factory price trend

the global electricity market and reached new heights. From price swings ...

BNEF found that, due in part to a widespread shift to lower-cost lithium iron phosphate (LFP) battery cells, stationary energy storage pack prices ...

Lithium fell to 134,500 CNY/T on February 6, 2026, down 6.60% from the previous day. Over the past month, Lithium's price has risen 0.75%, and is up 74.00% compared to the same time last year, ...

Discover the latest lithium battery energy storage prices and industry trends in 2024. This guide breaks down cost factors, regional pricing variations, and application-specific solutions to help businesses ...

New York, December 9, 2025 - lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF ...

Average lithium-ion battery pack costs fell 8% to \$108/kWh in 2025, a 93% drop since 2010. China leads at \$84/kWh with LFP, while stationary storage packs hit benchmark lows of ...

Global lithium-ion battery prices will continue their decline in 2026, though at a slower pace of 3%, reaching \$105 per kilowatt-hour. According to the latest survey from research firm ...
