The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID.

Moldova is planning a new tender for the construction of large renewable energy parks colocated with battery energy storage for autumn this year. The timeline for the tender was presented ...

Moldova will buy a Battery energy storing system (BESS) of the last generation, with a capacity of 75 MW, as well as internal combustion engines (ICE) with a capacity of 22 MW. This will ...

Moldova is preparing for its second major renewable energy auction in autumn 2025, this time focusing on onshore wind farms equipped with integrated battery energy storage systems ...

The tender process, launched by USAID through the Moldova Energy Security Activity (MESA) in partnership with the Ministry of Energy, includes the acquisition of a 75 MW energy ...

Moldova prepares a 170 MW wind and storage tender for 2026, introducing mandatory battery systems and clearer rules for hybrid projects. Learn how Moldova wind and storage tender supports national ...

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. The ...

Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE) with a capacity of 22 MW to strengthen the ...

Building on this momentum, the second auction, scheduled for autumn 2025, will introduce battery energy storage systems (BESS) alongside wind projects, marking a pivotal step in ...

Energy storage projects under construction in Moldova

The US will invest EUR78.6 million in a large-scale battery energy storage system in Moldova to enhance the country's energy resilience.
