Under the deal, LG Energy Solution will hold full ownership of the plant in Windsor, Ont., with the acquisition of the 49-per-cent stake held by Stellantis. The battery division of the South ...

According to a press release, the cost of battery storage is also declining, with Ontario citing an average price per megawatt of \$672.32 in 2024, which represents a 24 per cent decrease ...

Canada's support will be contingent upon actual production and sales, and will decrease by 25 percentage points each year starting in 2030, with the credit being fully phased out after 2032.

For LG Energy Solution, the move consolidates control over a strategic manufacturing asset at a time when battery demand is fragmenting across multiple sectors.

Canada Electric Vehicle Battery Manufacturing analysis includes a market forecast outlook for 2025 to 2030 and historical overview. Get a sample of this industry analysis as a free report PDF ...

Stellantis has announced that its recently finished battery plant in Windsor, Ontario will begin production of batteries for energy storage, not for electric vehicles as originally planned,...

The Ontario government has concluded the largest battery storage procurement in Canada's history and secured the necessary electricity generation to support the province's growing ...

Automaker Stellantis is selling its stake in an Ontario battery manufacturing plant to its joint venture partner LG Energy Solution for a nominal US\$100, as the automaker announced a broader ...
