Overview of EPA's law and regulatory information, including complying with and enforcing environmental regulations.

While more and more stadiums take the step to develop on-site solar energy generation systems to minimize the environmental impact of their energy use and realize the associated financial and brand ...

Discover how Energy Storage Engineers design sustainable systems for sports facilities to boost renewable energy integration.

The results show the partial and total shift of impacts on the environment of photovoltaic energy storage in comparison with photovoltaic energy export across the building life cycle. Along ...

Renewable energy is reshaping the sports industry by enhancing sustainability and reducing operational costs. This article explores applications of renewable energy in sports, ...

Ways to contact or connect with EPA include social media, libraries, FOIA requests, mailing addresses, staff directory, commenting on EPA regulations, and how to report environmental ...

Healthier environments could prevent almost one quarter of the global burden of disease. The COVID-19 pandemic is a further reminder of the delicate relationship between people and our ...

WASHINGTON - U.S. Environmental Protection Agency (EPA) Administrator Lee Zeldin announced the agency will undertake 31 historic actions in the greatest and most consequential day ...

Solar panels are among the most accessible renewable energy solutions for sports facilities. With

Environmental Comparison of Photovoltaic Energy Storage Cabinets Used in Sports Venues

advancements in photovoltaic technology, stadiums worldwide are harnessing the ...

EPA's resources on environmental issues include research, basics, what you can do, and an index covering more specific terms.

Find environmental information in your location, by state, by zip code, or by geographic region.

It is foreseeable that as winter sports continue to gain global popularity, the energy consumption challenges faced by ice arenas will become increasingly prominent. Studying energy ...
