How much do solar panels cost in Europe?

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall.

How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of EUR0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of EUR0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

How much does a solar panel cost?

Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of EUR0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of EUR0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

According to the latest data, prices for PV modules in Europe remained steady across all segments in October 2025. This stability is a stark contrast to previous months, which saw significant ...

Updated guide to photovoltaic module prices shows current solar panel costs in Europe. High-efficiency modules have climbed to EUR0.115/Wp and are expected to rise further.

Due to limited data availability, we use the Global Price Index series reported by IRENA, based on pvXchange benchmark prices for modules sold in Europe. Historical prices have been ...

Summary: This analysis explores the current photovoltaic panel price trends in Europe, examining market drivers like raw material costs and policy changes. Discover regional price variations, future ...

European photovoltaic panel prices

Find out how much a photovoltaic system for a single family home costs in Europe, with and without storage, and how system size changes with EVs and heat pumps.

2025 Europe PV System Pricing - The "2025 Europe PV system pricing" report covers solar capex for 15 major countries across residential, commercial and utility-scale segments.

Only tax-free prices for photovoltaic modules are shown. The prices stated reflect the average offer prices in retail and on the European spot market (customs cleared).

The average price of several types of solar PV modules remained stable in Europe in November, matching consistency in the overall buyers' confidence in the European solar sector.

European PV panel prices rise, inverter prices fall! This has driven up prices for n-type monofacial solar panels and n-type bifacial solar panels as buyers continue to favor the brands of top ...

After 18 months of continuous decline, PV module prices in Europe are stabilizing. Will there be further increases ahead?
