Can solar power plants help Ukrainian society?

"Solar power plants can help Ukrainian society," Sokolovskyi says, by giving energy independence to private citizens and businesses. Moreover, support for critical infrastructure like hospitals, clinics and schools - the kind of work Semenyshyn's Repower Ukraine does - often comes from PV and energy storage combined.

How much solar power does Ukraine have in 2024?

Figures from the Solar Energy Association of Ukraine (SEAU) earlier this year showed that the country added around 850MW of solar PV capacity in 2024, the majority of which came from self-consumption systems installed by businesses. It's "become a trend", Semenyshyn says.

Why are Ukrainian businesses turning to self-consumption solar PV systems?

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

Did Russia attack Ukraine's energy infrastructure in 2024?

Energy has been a major target for Russian drones and missiles throughout the war, with an intensification from the spring of 2024; at the time of writing, news broke overnight that Moscow had carried out a "massive" missile attack on Ukrainian energy infrastructure.

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

The Solar Energy Association of Ukraine estimates around 1.5 GW of solar was added in the country last year, driven by growing interest in projects co-located with battery energy storage ...

SOLARsk, a member of the Solar Energy Association of Ukraine, has completed the construction of Ukraine's first solar power plant built on the basis of a Ukrainian-made tracker system ...

Solar power plants installed at three water and wastewater utility sites in Chortkiv, Western Ukraine, support uninterrupted water services to residents. It is the first solar energy project ...

Ukraine's first floating solar (FPV) project has been launched in the Odesa region, marking a new phase in

First solar ukraine

distributed, land-light generation. Deployed on a water body, the plant uses ...

The Ukrainian company SOLARsk has completed the construction of the country's first solar power plant built on the basis of a domestically produced tracker system -- HSAT HORIZON ...

Solar power is driving Ukraine's energy resilience and decentralization amid wartime challenges. With 800 MW of new solar capacity added in 2024 and a growing pipeline of municipal ...

First Solar thin-film solar panels Due to the significant decrease in cost and the rapid growth in popularity of private solar power plants, the range of solar panels on the Ukrainian market ...

The changing landscape of international aid to Ukraine puts a new focus on its energy sector and the boom in self-consumption PV systems.

SOLARsk launched Ukraine's first solar power plant with HSAT HORIZON STR-111 trackers, boosting efficiency by 20% and reducing CO2 emissions.
