Do I need a cover for my Generator in the rain?

If you plan on using your generator in the rain, a proper cover is non-negotiable. Whether you go with a purpose-built tent or build your own enclosure, protecting the engine and outlets from moisture is what keeps you--and your generator--alive.

Do generator covers work in wet conditions?

A good cover can prevent electrocution, internal damage, and even total failure of your generator--while keeping you from standing outside with a tarp like a lunatic. I've tested a handful and researched dozens. Below are the best generator covers and enclosures that actually work in wet conditions, plus what to avoid.

Can a generator run in the rain?

To safely run a generator in the rain, you need a weatherproof cover or enclosure that keeps water out while letting heat and fumes escape. A good cover can prevent electrocution, internal damage, and even total failure of your generator--while keeping you from standing outside with a tarp like a lunatic. I've tested a handful and researched dozens.

What is a generator enclosure?

The enclosure is attached to the main base frame of the generator set. Usually, it encloses the engine coupled to the generator, auxiliary equipment, including an engine-mounted radiator, starter battery, generator controls, generator circuit breaker, complete base-spec generator. 1.3 AUTOMATIC TRANSFER SWITCH (ATS): Usually, the ATS is mounted inside the
