Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that ...

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries ...

The present review study, through a detailed and systematic literature survey, summarizes the world solar energy status along with the published solar energy potential ...

Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's share ...

Solar PV will account for around 80% of the global increase in renewable power capacity over the next five years - driven by low costs ...

In the last few years, solar energy has been the main driver for renewable energy growth worldwide. In 2024, solar photovoltaic ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal ...
