Solar and wind powered generators have been used to provide auxiliary electrical power. However, these Systems have not been available in a compact, conveniently portable package that is relatively inexpensive ...

Search and read the full text of patents from around the world with Google Patents, and find prior art in our index of non-patent literature.

Search specific patents by importing a CSV or list of patent publication or application numbers. The present invention relates to the technical field of solar energy and wind energy.

By adopting advanced photovoltaic direct-driven technology, the system can achieve power generation by utilising solar power while consuming electricity, prioritising the use of photovoltaic power.

The graph shows the distribution of patents among 26 fossil fuel technologies, which are broken down by sector (upstream, processing and downstream, transmission and distribution).

Abstract: A floating solar photovoltaic system and a method for cooling a back surface of a photovoltaic panel are described.

The present disclosure includes articles of manufacture, systems and processes that relate to a portable, modular solar power generator with energy storage capacity and an energy management system to ...

energy innovation-related patenting expand? We find that energy innovation-related patenting has first expanded exponentially up until 2013, both in terms of the total number of patent families and PCT international patent ...

In December 2018, Gree Electric won the China Patent Gold Award with the invention patent of "Photovoltaic Direct Drive System and Its Control Method", and used this patent to develop a

Gree Solar Power Generation System Patent

photovoltaic ...

Abstract: A system includes a flexible datacenter and a power generation unit that generates power on an intermittent basis. The flexible datacenter is coupled to both the power generation unit and grid ...
