What is Huaneng Shangdu wind power base?

At 23:58 on June 30,2023,the Huaneng Shangdu Million Kilopower Wind Power Base,the first wind fire baling and outgoing new energy base project in China,was connected to the grid in full capacity,marking that the installed capacity of China Huaneng Group's new energy exceeded 60 million kW.

What is China Huaneng doing in 2023?

Since 2023,China Huaneng has focused on building a new power system and new energy system,continued to accelerate the pace of green transformation,and made every effort to focus on the development of large bases,running a new "acceleration" of new energy development,achieving a leap of 60 million kilowatts of new energy installed capacity.

What does China Huaneng do?

China Huaneng actively serves the "dual carbon" goal,vigorously promotes green and low-carbon transformation,and continuously promotes the leapfrog development of new energy in scale and efficiency. The installed capacity of new energy has exceeded 50 million kilowatts by the end of 2022.

The project can generate more than 253 million kilowatt-hours of clean electricity annually, which is equal to saving 78,100 tonnes of standard coal. It is also equivalent to reducing ...

The project generates 200,000MWh electricity thereby offsetting 188,300t of carbon dioxide emissions (CO2) a year. The wind power project consists of 20 turbines each with 3.6 MW ...

The project has an installed capacity of 760,000 kilowatts of wind power and 240,000 kilowatts of photovoltaic power. It can produce 2.271 billion kilowatt-hours of green electricity ...

Scheduled for grid connection in June, the project is expected to generate an annual output exceeding 490 million kilowatt-hours, equivalent to replacing about 119,000 metric tons of ...

After the completion of Huaneng Shangdu Million Kilopower Wind Power Base Project, it can deliver 6.5 billion kWh of clean power to Beijing Tianjin Tangshan region every year

How many watts does Huaneng Wind Power generate in a year

The second phase has an installed capacity of 2.7725GW, comprising 2.2329GW of wind power and 539.6MW of solar power. Upon completion, the facility will generate approximately ...

The Huaneng wind power project, located in Mengcheng county, has a total installed capacity of 200 megawatts and 63 wind turbines. Since June 2020, a total of 432.9 million kilowatt-hours of electricity ...

When the plant is fully operational, its 150 wind turbines are expected to generate annual on-grid power of 1.75 billion kWh, which can meet the electricity demand of 1 million households per year, ...

Online access > Wind farms > Huaneng (China) [Back to previous page] China wind farms file General data Map Generalities Wind farm name: Huaneng Country: China County / Zone: ...
