How much power do you need for a camping trip?

For small, off-grid camping trips, you don't need much: A simple power pack or small solar panel can be more than enough! To calculate your maximum power output, start by making a list of all the devices you plan to use simultaneously during your camping trip.

How much power does a camper need?

A: Most casual campers use 200-500Wh/day, depending on gear. Q: Is solar necessary? A: Not for short trips, but helpful for 3+ day off-grid camping. Q: Can I run a small blender or coffee maker? A: Yes, but check the wattage. Most power stations need to be 300W+ rated to handle short bursts.

How much power does a camping device use?

You can typically find this information on the device itself or in its user manual. Popular camping devices like LED lights, smartphones, and portable fans usually consume between 5-50 watts. In contrast, more power-hungry equipment like laptops, electric grills, and mini-refrigerators can consume up to 150 watts or more.

Do you need a portable power setup for a camping trip?

Whether you're heading out for a weekend in the woods or building a longer off-grid setup, having the right portable power setup can make or break your camping trip.
