Are fake solar panels dangerous?

One of the main risks associated with fake solar panels is their quality. Often they are made of low-quality materials and less stringent manufacturing standards are used. This leads to lower efficiency and shorter panel life.

Are counterfeit photovoltaic solar products dangerous?

The first danger associated with counterfeit photovoltaic solar products is their quality. They are often made of cheap materials and less stringent manufacturing standards are used. This leads to lower efficiency and shorter solar cell life.

What happens if a photovoltaic system fails?

Poor quality can also lead to the failure of the photovoltaic system as a whole, which in turn increases the risk of financial loss and lack of expected economic benefits for both the end customer and the installer (e.g., when non-authentic solar panels need to be replaced with new ones).

In this case, it is idiomatic to say "compensate for the cost"? Here is my draft example: Mary bought a very expensive car. As the car cost her too much money, she decides ...

You can use either verb in either part of the sentence, but "compensate for" is much less likely in everyday speech. I would use "make up for" nine times out of ten (or more).
