How to install a kitchen cabinet?

Because of small space behind and underneath and an easier installation, it is recommended to prepare all cables before putting the cabinet in the position. Position the cabinet with 3-5 cm distance to the wall on the ground and use the screw-in feet to level it out in horizontal and vertical plane. **WARNING !!!**

How do you connect a solar inverter to a grid-tie system?

Follow the instructions in the inverter manual. The idea largely remains the same: connect the positive and negative cables from your solar panels or battery bank to the designated DC input terminals on the inverter. In a grid-tie system, only a certified electrician can connect your solar system to the grid.

Can a utility representative connect a solar system to the grid?

Only a utility representative can connect a solar system to the grid and he has to verify that it is safe for the grid and complies with building and electrical codes in the area. We recommend DIY-installation only for home off-grid and mobile off-grid systems and only for those who have the necessary skills.
