India is spearheading a solar energy revolution, aiming for 500 GW of non-fossil fuel energy capacity by 2030. The country has rapidly expanded its solar sector, surpassing 100 GW in ...

In order to achieve the above target, Government of India have launched various schemes to encourage generation of solar power in the country like Solar Park Scheme, VGF Schemes, CPSU Scheme, ...

India is on track to meet its 500 gigawatt clean energy goal by 2030. Current capacity additions are strong, but a significant challenge remains with slow power demand growth. Investors ...

The Government of India has set an objective of adding 175 GW of installed renewable-energy capacity by 2022, with 100 GW coming from solar power, 60 GW from wind power, 10 GW ...

The 14th National Electricity Plan (NEP14), introduced in May 2023, aims to double the country's electricity generation capacity by 2032, with solar energy poised to play a pivotal role.

India is in the middle of a major shift in how it generates electricity as solar installations continue to rise at a pace that has surprised even power sector planners. Large-scale projects, policy ...

India has declared an ambitious target of 500 GW of renewable energy (RE) by 2030, comprising around 280-300 GW of solar energy alone. As India graduates from 100 GW to triple its ...

Gujarat has been a leader in solar-power generation in India due to its high solar-power potential, availability of vacant land, connectivity, transmission and distribution infrastructure and utilities.

India has set an ambitious goal of achieving 500 GW of renewable energy capacity by 2030, a commitment that aligns with its pledge at COP26 to reach net-zero emissions by 2070. ...

The government is running a scheme called "Development of Solar Parks and Ultra Mega Solar Power

India Solar Power Generation Plan

Projects" to set up large solar power plants connected to the electricity grid, with a ...
