Should I install a whole-home solar generator?

Installing a whole-home solar generator ensures energy security and protects your home and family during even extended blackouts.

Do you need a solar generator?

Most solar ready-made generators have enough power to power the average home and cater to your needs. However, if you need to power your entire home or get more power than usual, you'd need to invest in a couple of solar generators to achieve this.

Can a solar generator be used as a power station?

A solar generator can supply energy anywhere, from any appliance, from fridges to laptops to fans. You can use solar generators as portable power stations during camping or source of home backup power during blackouts. There are several ways to deploy portable generators.

Should you buy a solar generator?

But, as mentioned earlier, you'll need to weigh the power differences out with the fact that solar generators don't need fuel, emit no noise, and can be used indoors with ease. While the upfront costs for a solar generator may be more than a gas-powered one, consider long-term costs as well.

Whether you're using a portable or permanent generator, we highly recommend that you consult a professional before installing your setup, and double-check local municipal regulations and ...
