How long did Berlin's power outage last?

Following an arson attack, the capital experienced its longest power outage since the Second World War, lasting around 60 hours, according to network operator Stromnetz Berlin. The around 50,000 electricity customers affected in south-east Berlin since Tuesday night (September 9, 2025) have been supplied again since late afternoon.

Will Berlin's power supply be restored after a far-left attack?

Authorities say the power supply is being restored to thousands of households in Berlin that had been without electricity in freezing temperatures for four days following a suspected far-left attack on high-voltage lines.

What caused the Berlin-Johannisthal power outage?

The cause of the widespread power outage was an arson attack. The fire destroyed several thick power lines at the foot of two electricity pylons in Berlin-Johannisthal in the district of Treptow-Köpenick. It took the fire brigade an hour just to extinguish the fire.

How many people were affected by Berlin's power outage?

Roughly 45,000 homes and more than 2,000 businesses in Berlin's wealthy southwestern districts were affected by the outage, which lasted more than four days. The outage is believed to be the longest in Berlin's postwar history. What exactly happened?
