The Junma Solar Power Station, completed in 2019, is arguably the most striking feature of this project. Designed in the shape of a galloping horse, it earned a Guinness World Record for the largest image ...

Read the latest version. The Junma Solar Power Station, shaped like a horse and located in the Kubuqi Desert, is a key component of China's ambitious "Solar Great Wall" initiative. This project aims to ...

A notable feature within the Kubuqi Desert's solar array is the Junma Solar Power Station, completed in 2019. This installation set a Guinness World Record for the largest image made of solar ...

The Junma solar power station -- "Junma" meaning "fine horse" in Chinese -- is part of an ambitious desert reclamation project known as the "great photovoltaic wall," stretching along the northern ...

Engineers must be having fun with the project as they also designed the Guinness World Record holder for the largest image made of solar panels with the Junma Solar Power Station (it's the...

By the end of November 2022, the Junma Solar Power Station had generated a total of 2.543 billion kWh of green electricity, which is equivalent to saving 840,000 tons of coal and reducing 2.03 million tons of carbon ...

Junma, completed in 2019, resembles a galloping horse and holds a Guinness World Record for the largest image made from solar panels. The installation generates enough electricity each year...

With regards to the Solar Great Wall project, the Junma Solar Power Station, which is shaped like a galloping horse and was completed in 2019, surely is a standout feature.

The Junma Solar Power Station, a part of this grand project, stands out not just for its energy output but for its unique design. Crafted in the shape of a galloping horse, it holds the Guinness World ...

Junma Photovoltaic Panel

The solar farm that resembles a galloping horse-- Junma Solar Power Station --was completed in 2019, setting a Guinness world record for the largest image made of solar panels.
