It was built in 2006 on Mont Jali near the capital Kigali. The plant uses photovoltaics and has a peak output of 250 kW and an estimated annual output of 325,000 kWh.

Kigali Solaire - Kigali Photovoltaic Power Plant is a solar power plant with a total output of 250 kW. Data © OpenStreetMap contributors, ODbL. International regions © MarineRegions , CC-BY. Analysis ...

It was built in 2006 on Mont Jali near the capital Kigali. The plant uses photovoltaics and has a peak output of 250& #160;kW and an estimated annual output of 325,000 kWh.

Reliable water means reliable harvests. In Kigali, a 200 kW solar + 482 kWh battery system now powers irrigation for over 100 farmers, replacing unstable grid and costly diesel pumps.

This article explores how this project enhances grid stability, supports solar/wind integration, and positions Rwanda as a leader in Africa's clean energy future.

Renewable energy integration is reshaping Africa's power landscape, and the Kigali Wind and Solar Hydrogen Storage Base stands at the forefront of this transformation.

The solar field in Rwanda, the first utility-scale solar photovoltaic (PV) field in East Africa, and first in sub-Saharan Africa outside of South Africa, was developed, financed and constructed in record time.

STATUS:Operational LOCATION:Kigali, Rwanda TYPE: Solar SIZE:250kWp PARTNERS:EAP, Hope Foundation Association BACK TO OUR PROJECTS

Rwanda's ambitious vision to achieve 60% renewable energy by 2030 hinges on one critical component: Kigali energy storage battery supply. As solar and wind projects multiply, reliable battery systems ...
