When Tesla unveiled its next-generation energy storage systems--Megapack 3 and the new Megablock--on September 15, 2025, it marked a pivotal moment in the evolution of utility-scale ...

Three non-lithium energy storage projects came online in August, Rho Motion said, the largest of these being a 100MW/400MWh flow battery project in China, the Poly Flow Chuxiong ...

U.S. power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the U.S. power grid in 2026 in our latest Preliminary Monthly ...

Once built, DCEP will be the largest battery energy storage system in the world, highlighting California's leadership in clean energy innovation and infrastructure.

With the growing demand for large-scale battery packs, Tesla purchased land in Lathrop, California in 2021 to set up a Megapack production factory. At this time, Tesla was already supplying ...

Megapack is a utility-scale battery that provides reliable energy storage, to stabilize the grid and prevents outages. Find out more about Megapack.

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, California,...

A decade ago, large-scale battery storage was considered the mythical Holy Grail to solving renewable energy's intermittency woes with sunshine and wind. The early pilot projects ...

Tesla has landed a massive contract with Intersect Power for an unbelievably large battery energy storage system (BESS) project using 15.3 GWh of Megapack for its needs.

Large-scale energy storage project landed

Tesla's electric vehicles (EVs) have been making headlines but the company has made a new achievement in the energy storage sector by securing its largest-ever Megapack contract with ...
