-----  
What is LYV's energy management system?

Lyv develops integrated systems to support the energy transition. Lyv is a pioneer in the field of smart energy systems, or smart grids, as such systems are also known. The extensive experience within Lyv with energy production, energy trading and the change of the energy world are the basis on which Lyv's energy management system is built.

What is LYV & how does it work?

Lyv, founded in 2016 by Brendan de Graaf, focuses on solving energy challenges like grid capacity and imbalance. Using its energy management systems (EMS) and batteries, Lyv helps businesses, parks, and homes balance energy use. Their EMS works with various devices, controlling batteries, chargers, and boilers.

Why did van Dorp acquire LYV?

Van Dorp, a family-run Dutch company from Zoetermeer focused on sustainable technical installations in buildings, is acquiring Lyv, a Dutch developer of batteries and energy management software. This acquisition broadens Van Dorp's energy services by adding storage and management technology.
