The Middle East and North Africa (MENA) region is emerging as a global solar energy leader. With falling solar costs, government-backed clean energy strategies, and strong partnerships ...

While it is projected to reach its full capacity of 5 GW by the end of this decade, the current operational capacity of over 2.6 GW already positions it as one of the largest solar projects in ...

The \$2 billion Saudi-Türkiye solar agreement highlights the accelerating momentum of renewable energy deployment across the Middle East and Eurasia. As countries pursue ...

The Middle East continues to scale clean energy through mega solar projects, battery storage expansion, green hydrogen partnerships, and cross-border renewable investments.

Receiving over 2,000 kWh/m² annually in solar irradiation and benefiting from an 89% drop in solar generation costs since 2010, the region could leverage this abundant natural resource to become a ...

Weekly roundup of the Middle East's latest solar, storage, hydrogen, and clean energy projects shaping the region's energy transition.

The share of solar energy in the Middle East and North Africa's (MENA) energy mix has grown significantly in recent years. Solar capacity in the region rose 23 percent in 2023 to 32 ...

The holistic solar project tracker covers 100+ number of under construction, announced/proposed, pre-construction solar PV projects across all countries of Middle East.

The Middle East and North Africa is preparing for an unprecedented construction boom in renewable energy infrastructure. According to DNV, the region's wind and solar capacity could ...

The share of solar energy in the Middle East and North Africa's ...

Megawatt solar in the middle east

The report highlights record-breaking progress in deploying large-scale solar projects across the MENA region. These projects have achieved some of the lowest Levelized Cost of Energy (LCOE) globally, ...
