What's going on with EV batteries in Morocco?

The battery industry chain centered around LFP is forming rapidly. In June this year, the Moroccan government announced that Gotion High-Tech would invest \$1.3 billion (US) to build a gigafactory for EV batteries.

Which Chinese lithium battery companies are based in Morocco?

Since 2023, several Chinese lithium battery industry chain companies, including CATL, Gotion High-Tech, Sunwoda, BTR, Huayou Cobalt, CNGR Advanced Material and Tinci Materials, have collectively invested in Morocco and built factories. The battery industry chain centered around LFP is forming rapidly.

Why should Morocco invest in lithium & electric batteries?

Thanks to its natural resources, advantageous geographical position and strategic partnerships with global players, Morocco aims to become a regional hub for sustainable technologies for Africa and Europe by investing heavily in the lithium and electric battery industry.

What is Morocco's energy storage testbed project?

The projects are spearheaded by the Moroccan Agency for Sustainable Energy (MASEN) and Morocco's national electricity company ONEE. On May 20, 2025, MASEN received financing approval from the World Bank for its "Morocco Energy Storage Testbed Project", aiming to enhance grid stability.

01 Rich Resources and Widespread Investments Since 2023, several Chinese lithium battery industry chain companies, including CATL, Gotion High-Tech, Sunwoda, BTR, Huayou ...

Morocco is rapidly emerging as a leader in renewable energy integration, and its latest energy storage projects are capturing global attention. This article explores how the country's strategic investments ...

Morocco is making history as the host of Africa's first battery gigafactory, following a landmark \$5.6 billion investment from China's Gotion High-Tech. This groundbreaking project ...

Morocco launches a national battery storage programme of 1600 MWh to stabilise its electricity grid amid growing renewable energy production.

The Battery Storage Gap in Renewable Energy Morocco's got 42% of its electricity from renewables in 2024 [6], but here's the catch: solar and wind power need massive energy storage to stabilize grids. ...

Why Morocco is Becoming Africa's Battery Bank A country where the sun blazes 3,000+ hours annually and coastal winds could power entire cities. Welcome to Morocco - North Africa's ...

Morocco aims to become a leader in renewable energy and green hydrogen, attracting investments through supportive policies. Innovative battery technologies, particularly LFP batteries, ...

In this regard, the country is emerging as a future regional hub for lithium and electric batteries, thanks to its agreements with the South Korean giant and world leader in energy storage ...

Morocco is accelerating its energy transition by issuing a global call for expressions of interest to build two large-scale battery storage facilities. The projects are spearheaded by the ...

Morocco is fully engaged in this dynamic. On May 20, 2025, the Masen Agency announced a new pilot project called the "Morocco Energy Storage Testbed Project," validated by the ...
