Summary: Norway is rapidly advancing its energy storage projects to support renewable integration and grid stability. This article explores the latest trends, government policies, and technological ...

A ruling by the European Free Trade Association Court that Norway's continental shelf falls under the European Economic Area Agreement could dramatically reshape the country's climate ...

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated ...

Energy Transition Norway's research and development (R& D) projects focus on renewable energy, carbon capture and storage (CCS), enhanced oil recovery, and decommissioning.

In this paper, the ten existing pumped storage plants in Norway are presented, several of which are capable of seasonal energy storage.

Solar energy is expected to be a key driver of renewable energy growth in the energy transition. In this report we look at the Norwegian conditions to engage in solar energy both nationally and internationally.

State-owned Botswana Power Corporation (BPC) has awarded Norwegian company Scatec ASA a contract to build a 50 MW solar plant, the companies announced on Wednesday, ...

This \$120 million initiative near Tromsø combines bifacial solar panels with liquid-cooled battery storage, achieving 89% efficiency in sub-zero temperatures - that's like giving a Tesla battery a PhD in ...

Most recently, in June 2025, Energeia AS was granted a licence to construct the Seval Skog solar power plant in Gjøvik Municipality. The solar power plant will incorporate a battery energy storage system ...

Norway 50MW solar energy storage project

Norway is at the forefront of energy storage innovation, leveraging its rich hydropower heritage and cutting-edge technologies.
