Are solar panels free?

When companies advertise "free solar panels" or "no-cost solar programs," they're often referring to solar leases or solar PPAs. Under these solar financing arrangements, a solar company will put a solar panel system on your roof at no up-front cost for installation, enrollment, or maintenance. This sounds great.

What are the disadvantages of a "free" solar panel program?

Here are a few of the main downsides of going with a "free" solar panel program: **Low-quality equipment:** Some low-cost solar energy systems may also have lower-quality parts and poor-quality installations. **Built-in rate escalators:** Many PPAs and solar leases include scheduled rate escalators.

How much do solar panels cost?

On average, solar panels cost \$18,000 to \$43,000 before any financial incentives. Many of these programs are only available to people who buy their solar panels. It's worth mentioning that you can finance the cost of your solar panels with a solar loan, reducing your initial investment to just a down payment.

Should you sign up for free solar panels?

Unsolicited leads from door-to-door salespeople: If a salesperson knocks on your door offering free solar panels, don't sign up for anything until you carefully research the company and its products. **High upfront costs and hidden fees:** Avoid signing a contract for "free" solar panel systems if a high upfront cost is still involved.

Let's cut through the sales pitch: free photovoltaic panel installations aren't truly free. These programs typically operate through roof leasing agreements where companies install solar equipment at no ...
