Why is 5G so expensive in Pakistan?

Building 5G networks is expensive. Each cell tower needs upgraded equipment. Fiber backhaul must connect towers to core networks. Power supply must be reliable, which is problematic in Pakistan where electricity is inconsistent. Telecom operators are businesses, not charities. They invest where they can make money.

How to get 5G in Pakistan?

You need three things: a 5G-capable phone, a Jazz or Zong SIM with a 5G data package, and location within coverage areas. Enable 5G in your phone's Mobile Network settings. Note that 5G packages cost more than 4G, and coverage remains limited even in major cities. Jazz 5G launch date in Pakistan?

How can Pakistani tech companies benefit from 5G?

Pakistani tech companies could build edge infrastructure services, creating new business opportunities. Private 5G networks for enterprises, industrial zones, and smart cities will grow faster than consumer 5G. Businesses can justify costs through productivity gains.

Which cities have 5G coverage in Pakistan?

Karachi, despite being the largest city and economic center, got coverage in phases across different zones. As of 2025, 5G coverage Pakistan offers is concentrated in these cities plus selective expansion to Faisalabad, Multan, Peshawar, and Quetta. Coverage within these cities varies wildly.
