All good, Pretoria is a higher income area so it's fairly safe, just when you do get here ask where to not go like townships or squatta camps. Otherwise Pretoria is actually quite nice

Pretoria proper as you would call it would be half white half black. I use the proper because the areas near to town are suburbs and mostly white. The whole of Tshwane would however be majority black ...

Generally Pretoria East will probably be a bit safer, there'll be crime everywhere but I think Hatfield, Brooklyn, Menlyn, Lynnwood, Waterkloof Ridge, etc. are all relatively safe but will be a bit ...

Discover what a Battery Management System (BMS) is and how it works to monitor, protect, and optimize battery performance in electric vehicles and energy storage.

Its sophisticated BMS optimizes battery power output based on state of charge, grid demand, and other considerations. It also balances charging and discharging cycles, which reduces battery degradation ...

At its core, a BMS is an intelligent electronic system that monitors, controls, and protects rechargeable battery packs. Imagine a battery pack as a team of cells: without a leader, the team ...

A list of Pretoria's Lost Spaces I've posted this list a couple of times in different subs over the last few years in response to questions about abandoned places in the city.

Pretoria is big on hiking trails, and if you aren't scared to drive 45 mins, you are in range of magaliesberg, hartbeespoort, Cullinan, Muldersdrift, are all excellent places to do some outdoors ...

3rd year in Pretoria, relocated because of employment. Great place but if you haven't accepted that we are the minority all over the city regions then you better start. Very accommodating place though, I've ...

Pretoria BMS Battery Management Power System

A Battery Management System (BMS) is essential for ensuring the safe and efficient operation of battery-powered systems. From real-time monitoring and cell balancing to thermal ...

This whitepaper provides an in-depth look at Battery Management Systems, exploring their architecture, key features, and how they contribute to battery safety and longevity.

Battery Management System (BMS) is the "intelligent manager" of modern battery packs, widely used in fields such as electric vehicles, energy storage stations, and consumer electronics.
