The World Bank is inviting consultants to submit proposals for a technical study on a 350 MW to 400 MW solar project with battery energy storage in Tunisia. The deadline for applications is March 24. [pdf]

The project is an important milestone for the transition of the energy supply in the Western Balkan countries towards a sustainable electricity supply. This is the first large-scale photovoltaic system in Kosovo that can ...

As Prishtina accelerates its transition to renewable energy, understanding energy storage power prices has become critical for businesses and municipalities. This article explores current market trends, price drivers, ...

Our Residential Solar Storage Systems are designed to provide homeowners with a reliable and efficient way to store excess solar energy, reducing electricity bills and increasing energy independence.

Together with experienced district heating experts from Austria, the Big Solar concept was adapted to the specific conditions in Prishtina to create an efficient, cost-effective and sustainable solution for the city's ...

Imagine a city where solar panels dance with Balkan winds while battery systems hum like orchestral conductors - welcome to the Pristina Photovoltaic Energy Storage Project, Kosovo's most ambitious leap ...

Lithium battery energy storage power stations in Pristina represent more than technology - they're Kosovo's bridge to energy independence. As projects scale and costs decline, these systems will play a vital role in ...

A photovoltaic energy storage project so efficient it could power 15,000 homes while making traditional power plants blush. That's exactly what Kosovo's Pristina Photovoltaic Energy Storage Project ...

But here's the kicker - without proper energy storage systems, those shiny new solar panels can't really change the game. Let's unpack what's happening and who's stepping up to fix it.
