How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

Should you DIY a solar panel system?

Setting up a solar panel system can be one of the most exciting home projects you'll ever take on, whether you're ready to tackle it yourself or prefer to bring in the pros. DIY offers that hands-on satisfaction--the thrill of piecing together your own energy source, step-by-step, right on your roof.

How do I choose a solar panel system?

Before installation, a thorough site assessment is essential to determine the feasibility and optimal design of your solar panel system. This process involves evaluating your property's solar potential, roof condition, and energy needs.
