Italy's environment and energy ministry has approved six utility-scale battery storage projects in Lazio, Campania, Basilicata and Puglia.

“It is reasonable to expect that, when fully operational, all new renewable energy plants will already be installed with integrated storage systems. And where the market does not cover the...

These developments suggest Italy's storage sector might not just meet its 2025 targets - it could potentially exceed them. The question isn't whether storage will transform Italy's energy landscape, ...

Figure 1: A map of Italian battery storage projects, broken down by stage of development. Outlining the huge influx of projects in the south and Sardinia, with almost no projects ...

Italy's Ministry of the Environment and Energy Security (Mase) has issued final approvals for five new battery energy storage system (BESS) projects, paving the way for 361 MW of new ...

The Italian energy market is marking another milestone with the addition of two battery energy storage system (BESS) projects in Sicily. With a combined capacity of 162 MW, these projects are part of the ...

In response, Italy is prioritizing the development of grid-scale battery energy storage systems (BESS Italy) alongside new industrial and commercial energy storage projects.

The Italian government has authorized eight BESS projects that will strengthen the stability of the power grid. Companies such as Edison Next and GreenGo stand out in this initiative.

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions--Lazio, Puglia, ...

Italy's installed storage fleet grew 23% by system count over the past year, but jumped 52% in capacity and
