How will Canberra transition from fossil fuels?

This opens up exciting opportunities in the cleantech and renewable energy industries. To drive this forward, we're preparing to electrify Canberra and transition away from fossil fuels, such as gas, petrol and diesel. This will mean phasing out approximately 139,000 fossil fuel gas connections and creating new all-electric suburbs.

What is Canberra's integrated energy plan?

To help everyone prepare for an electric future in a way that's fair and equitable, we've developed an Integrated Energy Plan. You can find out more about Canberra's Electrification Pathway by visiting the Everyday Climate Choices website

Can Canberra achieve zero net emissions by 2045?

The ACT has an ambitious target to achieve zero net emissions by 2045. This opens up exciting opportunities in the cleantech and renewable energy industries. To drive this forward, we're preparing to electrify Canberra and transition away from fossil fuels, such as gas, petrol and diesel.

Why should you visit Canberra?

From next-generation quantum computing to 100% renewable electricity, Canberra is an incubator for bold ideas and new technologies. The ACT has an ambitious target to achieve zero net emissions by 2045. This opens up exciting opportunities in the cleantech and renewable energy industries.

With a goal to achieve 100% renewable electricity, Canberra is investing in solar and wind farms, EV infrastructure, and intelligent battery storage. The integration of microgrid and ...

Canberra is Electrifying We're phasing out fossil fuel energy by 2045. Canberra has already achieved a nation leading 100% renewable electricity supply. The next step in the ACT's climate action journey ...

Canberra's Renewable Energy Transformation Canberra successfully achieved 100% electricity based on renewable energy sources. Next steps: replacing gas heating with electric systems, promotion of ...

The Integrated Energy Plan 2024-2030 sets out the next stage of work for the Territory's transition to an all-electric city over the next 20 years. It builds on the ACT's success in reaching 100 ...

Renewable electricity canberra

Canberra, the capital of Australia, has emerged as a global leader in the transition to renewable energy, achieving 100% renewable electricity in 2020, becoming the first city outside of ...

Canberra's journey toward achieving 100% renewable energy is not just a distant dream; it's an actionable goal firmly embedded in the city's ethos. The combination of extensive solar and ...

From next-generation quantum computing to 100% renewable electricity, Canberra is an incubator for bold ideas and new technologies. Electrifying Canberra The ACT has an ambitious target to achieve ...

Canberra, the capital of Australia, has made headlines by achieving a remarkable milestone: it has been powered completely by renewable energy since 2020. This achievement ...

The ACT Government is preparing to electrify Canberra and transition away from the use of fossil fuel energy by 2045. We already lead the country in 100% renewable electricity supply, with the next step ...

This goal was reached in 2020 when the Australian Capital Territory (ACT) -- home to the nation's half a million-strong capital, Canberra -- had enough renewable electricity to make coal and ...
